

Company Due-Diligence Checklist

Reference checklist & worked examples / 2026-09-11

Global Electronics, Manufacturing & Industrial Technology Solutions

Company identity and the source documents to request for contracting review. Aviation is one specialized vertical within the wider portfolio.

Review item	Information / requested document	Use
Legal name	Aimipaer (Shijiazhuang) Technology Co., Ltd	Business contact
Public website	https://aimipaer.com	Business contact
Operating scope	Electronics, manufacturing, assembly, OEM/ODM and industrial technology	Business contact
Business license / registration number	Request for contracting review	Request for your contracting review
Registered address / contracting details	Confirm against business registration and quotation	Request for your contracting review
Facility and manufacturing scope	Identify facility, products, processes and responsibility	Request for your contracting review
Payment beneficiary	Match contracting entity and approved payment instructions	Request for your contracting review
Certification evidence	Exact model, issuer, validity dates and covered scope	Request for your contracting review

Use this checklist to organize your document request. Obtain the relevant registration, facility and model documents for your contracting review. The worked examples on the following pages are templates, not inspection evidence.

Sample Approval Example

TRAINING EXAMPLE / DEMO-SAMPLE-CT65-001

A worked approval record for a 65W GaN configuration discussion.

Sample data only. No real product approval, batch registration or completed inspection is represented by this record.

Control	Example record	Disposition
Product / revision	CT-65 catalog configuration / DEMO-REV-A	Not a released SKU
Sample identity	DEMO-SAMPLE-CT65-001 / physical reference to be recorded	Training identifier
Appearance and labeling	Compare sample against the agreed artwork revision	Accepted in this example only
Port power sharing	Record voltage, current, load and simultaneous-port results	Hold for test evidence
Packaging	Check contents, QR format, serial placement and carton label	Revision requested in example
Reviewer / release	Training reviewer / no actual signature	No production release

Release & handoff requirements

Release only after the real sample ID, agreed criteria, results, exceptions, reviewer and signed approval are recorded.

For actual project documentation, submit the product, destination, order reference and requested evidence through aimipaer.com/trust-center/#document-request.

Batch Traceability Example

TRAINING EXAMPLE / DEMO-BATCH-CT65-001

A linked record from component lots to inspection and shipment handoff.

Sample data only. No real product approval, batch registration or completed inspection is represented by this record.

Traceability link	Example identifier	Record to attach
Approved configuration	DEMO-REV-A	Model / BOM revision and sample approval
Supplier component lot	DEMO-LOT-001	Supplier lot and incoming inspection record
Assembly batch	DEMO-BATCH-CT65-001	Facility, line, production date and operator record
Unit identity	DEMO-SERIAL-001 to DEMO-SERIAL-010	Serial list and secure verification-code mapping
QC report	DEMO-QC-001	Agreed test results, exceptions and disposition
Packing / shipment	DEMO-CARTON-001 / DEMO-SHIPMENT-001	Carton mapping, packing list and release approval

Release & handoff requirements

Keep real verification codes and customer records private. These sample identifiers are not registered products or real shipments.

For actual project documentation, submit the product, destination, order reference and requested evidence through aimipaer.com/trust-center/#document-request.

QC Report Sample

TRAINING EXAMPLE / DEMO-QC-001

Report structure for an agreed product and batch inspection.

Sample data only. No real product approval, batch registration or completed inspection is represented by this record.

Inspection item	Method / evidence required	Example disposition
Scope and sampling	Record model, batch size, sample size and agreed sampling plan	Scope review
Visual / dimensional	Approved drawing, calibrated tool ID and measured values	No measurements supplied
Functional / load	Document conditions, device setup and per-port results	Evidence required
Safety / compliance	Applicable model reports and authorized test evidence	No certification assertion
Packaging / identity	Record pack contents, serial readability and carton mapping	Review checklist
Nonconformity / release	Record defect, corrective action, reviewer and approval	Hold until reviewed

Release & handoff requirements

This is a training report structure, not a completed inspection, safety test, yield guarantee or certificate.

For actual project documentation, submit the product, destination, order reference and requested evidence through aimipaer.com/trust-center/#document-request.
