

Packaging Review Guidelines

A pre-dispatch checklist for product, retail pack, carton and shipment identification. Agree the applicable fields before inspection.

DOCUMENT STATUS

Procurement reference edition / 10 September 2026. Not a final approved model datasheet, certificate, quotation or contractual warranty. Confirm the exact SKU, sample and written order terms before purchase.

Check	Evidence to record
Product identity	Final SKU, variant, batch or serial, item description and approved reference sample.
Retail / inner pack	Correct item, accessories, instructions, plug variant, quantity and protection. Match the approved bill of materials.
Label and barcode	Approved artwork revision, destination language, legible text, barcode data and scan evidence. No unverified certification marks.
Battery products	Confirm actual Wh marking and applicable shipment documentation with the carrier and responsible parties. Do not infer transport approval.
Aviation / thermal stock	Artwork, dimensions, winding, core, sensor marks, sealing and storage instructions; agree scan/read test evidence.
Carton integrity	Agreed units per carton, cushioning, sealing, carton dimensions and gross/net weight. Validate transport testing only where contracted.
Release record	Sample or inspection ID, checked quantity, issues, photos, responsible reviewer, corrective action and release decision.

Release only against the agreed checklist

Unresolved mismatches must be documented and reviewed before shipment handoff. Inspection depth, sampling method and acceptance thresholds are agreed for the specific order; this guide does not assert a certification or independent laboratory result.
